#### **FOREWORD**

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

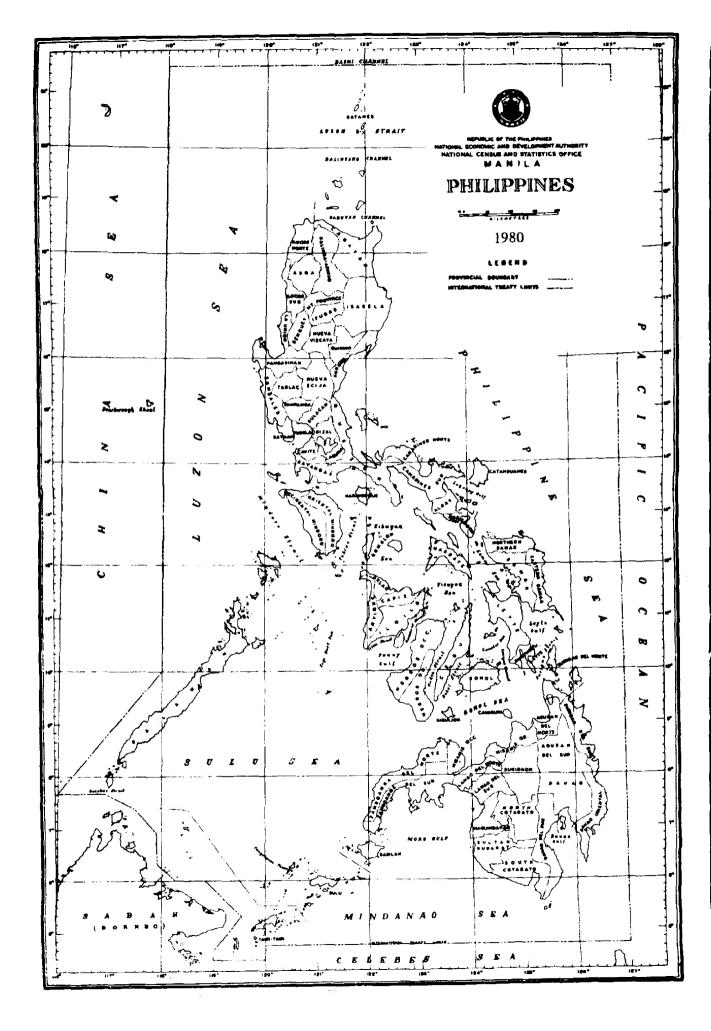

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

Manila, Philippines May 1983

## **Explanatory Text**

#### **GENERAL**

### INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

#### **AUTHORITY FOR THE 1980 CENSUS**

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every gensal year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

#### INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

## **CENSUS BOARDS**

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

### **CENSUS ORGANIZATION**

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

## METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the ifems asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

## PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

## POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

## CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Age Sex

Marital Status

Highest Grade Completed

Literacy

Language/Dialect Spoken in the

Household

Gainful and Non-Gainful Occupation

Major and Minor Industry

Migration

Housing Items

Type of Building

Type of Occupancy

Construction Materials of Roof and Outer

Walls

Year Built

Floor Area of Dwelling Unit

Tenure of Owner-Occupant with Respect

to the Land

Kind of Lighting Facilities

Use and Source of Water Supply

Type of Toilet Facilities Kind of Cooking Fuel Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

## **DEFINITION OF TERMS AND CONCEPTS**

## I - POPULATION

## BARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

#### **ENUMERATION AREA**

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

## URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

- 1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- 2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- 3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
  - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
  - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
  - c. At least three of the following:
    - 1) A town hall, church or chapel with religious services at least once a month;
    - 2) A public plaza, park or cemetery;
    - 3) A market place or building where trading activities are carried on at least once a week;
    - 4) A public building like a school, hospital, puericulture and health center or library.
- 4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

## PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

- Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
- 2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
  - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

- or within one year, if abroad;
- b. students who usually go home to their respective households at least once a week:
- c. persons working elsewhere who usually go home to their respective households at least once a week;
- d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions;
   (2) in mental hospitals;
   (3) in leprosaria or leper colonies; and
   (4) in rehabilitation centers for drug addicts;
- e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
- f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
- g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
- 3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
- 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
- 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
- 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
- 7. Persons found in the household who have no usual place of residence elsewhere;
- 8. Persons found in the household who are not certain of being enumerated elsewhere;
- 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
- 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
- 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
- 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

## PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

- 1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
- 2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
- 3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
- 4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
- 5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival;
- 6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a balikbayan who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
- 7. Citizens of foreign countries in refugee camps/vessels; and
- 8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

#### USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

#### HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

## PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

## RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

## LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

## **HEAD OF HOUSEHOLD**

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

## RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

- 1. Spouse a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
- 2. Son/daughter the head's own child, stepchild, or adopted child.

- 3. Son-in-law/daughter-in-law refers to a household member related to the head by marriage to his daughter or son.
- 4. Grandson/granddaughter child of the son or daughter of the head.
- 5. Other relative a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
- 6. Others any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

#### AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

#### **MARITAL STATUS**

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single If never been married.
- b. Married Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated —If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

#### **CITIZENSHIP**

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

## LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

## HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

## **USUAL OCCUPATION**

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

#### **INDUSTRY**

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

## **EVER-MARRIED WOMAN**

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

#### II - HOUSING

## BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoria, condominium) that was vacant;

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

## The different types of buildings are:

- 1. Single house a complete structure intended for one household. It includes the so-called "nipa hut" or a small house that is built as a more or less permanent dwelling unit.
- 2. Duplex a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
- 3. Apartment/accesoria/condominium/row house

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

- 4. Improvised (barong-barong) a makeshift or roughly constructed house usually built with salvaged materials.
- 5. Commercial/industrial/agricultural buildings not intended for human habitation but used as dwelling units at the time of the census.

Commercial – a building used for transacting business or rendering professional services, such as a storage or an office building.

Industrial — a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.

Agricultural — any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.

6. Other housing unit (natural shelter, boat, etc.)

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

- 7. Hotel, lodging house, dormitory, etc. This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
- 8. Institutional (hospital/convent/school dormitory/penal institution, etc.) a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
- 9. Other collective living quarters any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

## **DWELLING UNIT**

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

## CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Asbestos
- 4. Cogon/nipa
- 5. Makeshift/salvaged materials
- 6. Others (anahaw, etc.)

## CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Wood/plywood
- 4. Mixed tile/concrete/brick/stone and wood/plywood
- 5. Asbestos
- 6. Bamboo/sawali
- 7. Cogon/nipa
- 8. Makeshift/salvaged materials
- 9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

#### YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

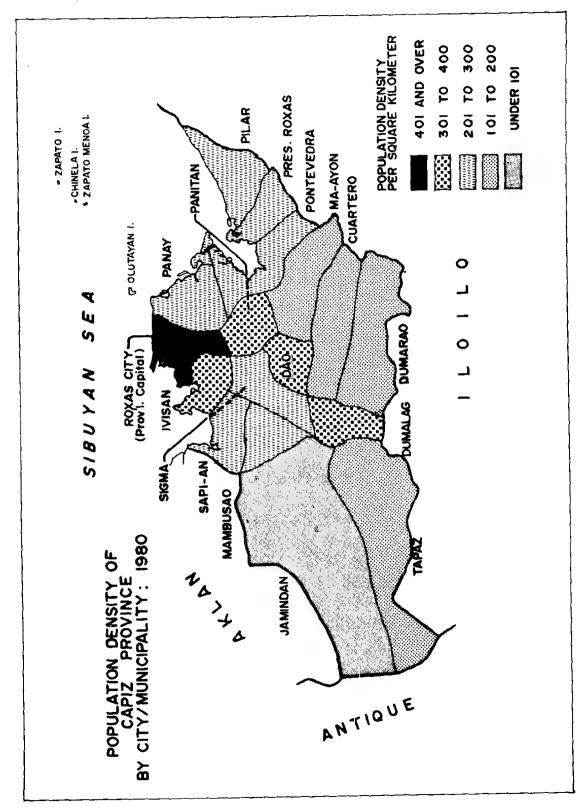

## NUMBER OF ROOMS IN THE DWELLING UNIT

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

#### FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Areas of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

## Capiz: A Brief Analysis

The province of Capiz is located in the Western Visayas region. It occupies the northeastern part of Panay Island and is bounded on the north by the Sibuyan Sea, on the northwest by Aklan, on the west by Antique and on the south by Iloilo.

Formerly within the jurisdiction of Oton, Iloilo, Capiz was organized a politico-military province in 1716 and occupied the whole northern section of Panay Island including the neighboring islands of Romblon, Maestro de Campo, Tablas and Sibuyan. A civil government was established in the province on April 5, 1901. A month later, Romblon was declared an independent province and on April 25, 1956, the territory of Capiz was further reduced with the declaration of its northwestern portion as the province of Aklan.

While the northern part of the province is made up mostly of plains, the western part is hilly and rugged. The waters adjacent to its coastline, approximately 80 kilometers long, constitute one of the richest fishing grounds in the entire region of Western Visayas.

The province has a land area of 2,633.2 square kilometers, representing 0.88 percent of the total land area of the country. There are 16 municipalities and 1 chartered city. Roxas City, center of commercial activities of the province, serves as the provincial capital.

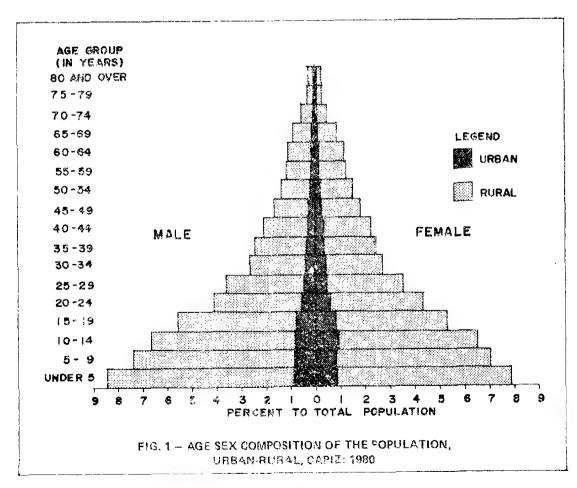

## **POPULATION**

As recorded on May 1,1980, the population of Capiz stood at 492,231 - 246,541 males and 245,690 females. Population density of the province moved upward, from 169.3 persons per square kilometer in 1975 to 186.9 in 1980. The population figure also put the annual geometric growth rate of the population since May 1, 1975 at 2.01 percent, after reaching a peak of 2.50 percent between 1970 and 1975.

The latest growth of population was brought about by the urban dwellers whose annual geometric growth rate rose from 0.12 percent between 1970 and 1975 to 2.29 percent. In contrast, the rural rate dropped from 2.94 percent between 1970-1975 to 1.96 percent between 1975-1980. Separately, the proportions of rural males and females to the total population registered, respectively, at 43.65 percent and 42.85 percent with the former registering a decrease and the latter, an increase.

TABLE A - URBAN-RURAL POPULATION BY SEX, CAPIZ: 1970, 1975 AND 1880

Area Classification and Sex	1980		19	975	1970	
	Number	Percent	Number	Percent	Number	Percent
Total	492,231	100.00	445,716	100.00	394,041	100.00
Male Female	246,541 245,690	50.09 49.91	224,352 221,364	50.33 49.67	191,526 202,515	48.61 51.39
Urban	66,427	13.50	<u>59,316</u>	13.31	59,683	15.15
Male Female	31,671 34,756	6.44 7.06	28,485 30,831	6.39 6.92	28,120 31,563	7.14 8.01
Rural	425,804	86.50	<u>386,400</u>	86.69	334,358	84.85
Male Female	214,870 210,934	43.65 42.85	195,867 190 533	43.94 42.75	163,406 170,952	41.47 43.38

Sex ratio (number of males per 100 females) of the population as a whole fell from 101.35 in 1975 to 100.35. In consonance to the predominance of males in 1975, the ratal population attained a sex ratio of 101.87. Meanwhile, the urban population became even more unbalanced with their 91.12-mates-per-100-females ratio.

From the group of persons under 5 years of age to 80 years old and above, the rural male and female population lesson as the group becomes older. Among the urban males, those 55-59 years old are outnumbered by those 60-64 years of age. On the other hand, urban females 10-14 years old exceed those belonging to any of the younger age groups.

## AGE COMPOSITION

Persons under 15 years of age make up 43.86 percent of the total population of the province. They decreased by 2.02 percentage points over the last five-year period, more than their 1970-1975 decline of 1.62 percentage points. In contrast, the proportion of those 15-64 years, considered as the productive age group, has been in the upward trend. After rising 1.74 percentage points between 1970 and 1975, it increased by 1.18 percentage points to 52.18 percent. Adults 65 years old and above total 3.96 percent compared with 3.12 percent in 1975 and 3.24 percent in 1970. Of the total urban population, 38.98 percent are under 15 years of age; 56.07 percent belong to the productive age group and 4.95 percent are at least 65 years old. Comparatively, 44.62 percent of the rural residents are 0-14 years old; 51.58 percent, 15-64 and 3.80 percent, 65 and over.

Below are comparative figures showing the age composition of the population in the three censal years:

TABLE B - AGE COMPOSITION OF THE POPULATION, CAPIZ: 1970, 1975 AND 1980

Age	1980		19	75	1970	
Composition	Number	Percent	Number	Percent	Number	Percent
Total	492.231	00,00	445,716	100,00	394,041	100.00
0-14 years	215,901	43.86	204,485	45.88	187,155	47.50
15-64 years	256,866	52.18	227,313	51.00	194,095	49.26
65 years and over	19,464	3,96	13,918	3.12	12,791	3,24

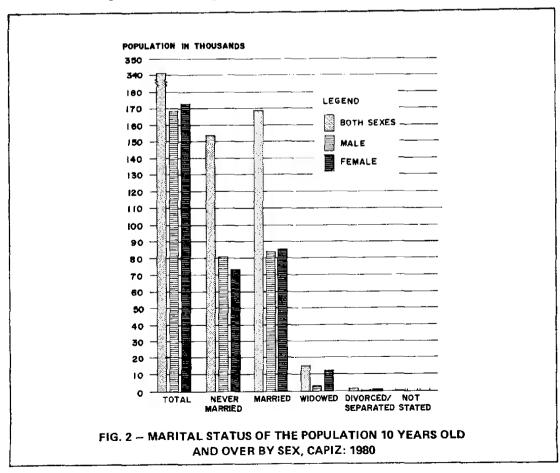

The province in general is progressively growing older as shown by the rise in its median age - 16 years in 1975 to 17 years in 1980 and in us aged-child ratio (number of elderly for every 100 children) - an increment of 2.21 points in a span of five years to its 9.02-elderly-per-100-children ratio.

With the increase in the percentage of persons in the productive age group, dependency ratio dropped to 91.63. Uroan dependency ratio was markedly less than the rural ratio, 78.36 for the former and 93.88 for the latter.

#### MARITAL STATUS

Married persons comprised 49.81 percent of the total population 10 years old and over. Among the urban dwellers married persons totalled 45.66 percent compared with 50.51 percent among the rural populace. The proportion of never married persons had a downward trend, from 49.44 percent in 1975 to 45.15 percent in 1980. Never married persons accounted for 48.80 percent of the urban dwellers and 44.53 percent of the rural residents. The 1975 proportion of widowed persons was incremented by 0.95 percentage point to come up with 4.58 percent. The divorced or separated slightly increased from 0.26 percent in 1975 to 0.38 percent. Those who did not disclose their status was negligible at 0.08 percent.

Never married males constituted 47.88 percent of the total males 10 years old and over, lower than the 1975 proportion of 52.21 percent. On the other hand, the proportion of married males increased from 46.00 percent in 1975 to 49.80 percent in 1980. Those widowed and divorced or separated likewise increased, respectively, to 2.07 percent and 0.20 percent. Among the females, 42.47 percent were never married, following a 4.19 percentage-point decrease. Married females rose from 47.27 percent in 1975 to 49.82 percent. The widowed and divorced or separated hiked to 7.03 percent and 0.56 percent, respectively. Males and females who kept silent about their status registered increases — 0.05 percent and 0.12 percent, respectively.

A BRIEF ANALYSIS

TABLE C -- POPULATION 10 YEARS OLD AND OVER BY SEX AND MARITAL STATUS, CAPIZ: 1970, 1975 AND 1980

Sex and	1980		19	975	1970		
Marital Status	Number	Percent	Number	Percent	Number	Percent	
Both Sexes	341,106	100.00	305,301	100.00	<u>264,229</u>	100.00	
Never married	154,005	45.15	150,926	49.44	129,382	48,97	
Married	169,896	49.81	142,387	46.64	122,505	46,36

Not stated	197	0.12	58	0.04	176	0.13	

## HIGHEST GRADE COMPLETED

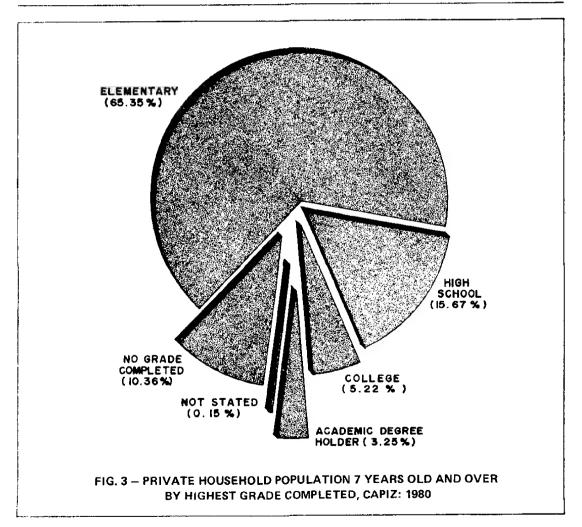

Persons with elementary training kept their marked predominance, but declined from 67.19 percent in 1975 to 65.35 percent of the private household population 7 years old and over. Those schooled up to the secondary level increased by 3.62 percentage points to 15.67 percent, while those who entered college and were still under graduates comprised 5.22 percent, 166 percentage points higher than that in 1975. Rising by 0.78 percentage point, academic degree holders accounted for 3.25 percent. Persons without formal education decreased from 13.63 percent in 1975 to 10.36 percent.

Of those who had training only in the elementary grade, 40.12 percent did not go beyond third grade; 20.28 percent attained the fourth grade; 13.61 percent, the fifth grade and 25.99 percent, the sixth or seventh grade. Among those with secondary education, 71.88 percent reached anywhere from the first to third year and 28.12 percent went through fourth year. Of the college schoolers, few (18.38%) attended fourth year or higher while a great majority (81.62%) finished only the lower collegiate years.

Table D shows the distribution of the private household population 7 years old and over according to highest grade completed in the last two censal years.

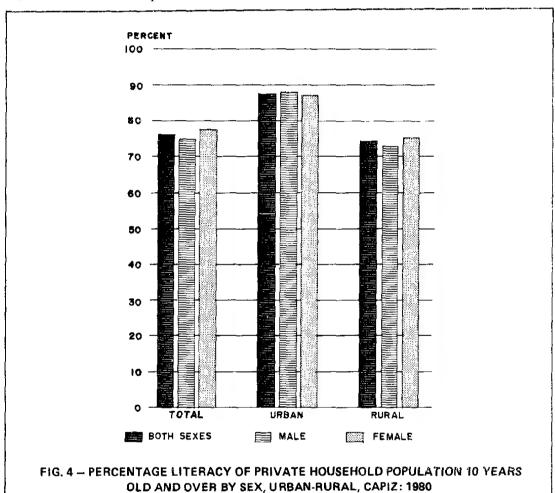

## TABLE D — PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER BY HIGHEST GRADE COMPLETED, CAPIZ: 1975 AND 1980

Highest Grade Completed	19	980	1975		
	Number	Percent	Number	Percent	
Total	<u>382,719</u>	100.00	347,470	100.00	
No grade completed	39,651	10.36	47,363	13.63	
Elementary	250,089	65.35	233,449	67.19	
High school	59,973	15.67	41,867	12.05	
College	19,985	5.22	12,367	3.56	
Academic degree holder	12,439	3.25	8,592	2.47	
Not stated	582	0.15	3,832	1.10	

## LITERACY

The literacy rate for all private household population 10 years old and over for the province of Capiz was 76.10 percent. For the urban areas, the literacy rate was 87.54 percent while for the rural areas, it was 74.17 percent. The accessibility of more schools in the urban areas attributed to their having a higher proportion of literates than their rural counterparts. In the urban areas, there were 40.97 percent male literates and 46.57 percent female literates while in the rural areas, 36.31 percent were male literates and 37.86 percent, female literates. In general, the males had a lower literacy rate at 74.86 percent compared with the females' 77.30 percent.

## LANGUAGE OR DIALECT

There are 19 languages and dialects reported spoken in the province of Capiz with Hiligaynon (Ilongo) as the dialect of almost all private households (99.54%). In Ivisan, a predominantly rural municipality, Hiligaynon is the only dialect spoken by the private households. In the urban areas, there are only four dialects commonly used, namely: Hiligaynon (99.55%), Tagalog (0.31%), Aklanon (0.09%) and Ifugao (0.05%). Almost all (99.53%) rural households speak Hiligaynon (Ilongo).

## **GAINFUL OCCUPATION**

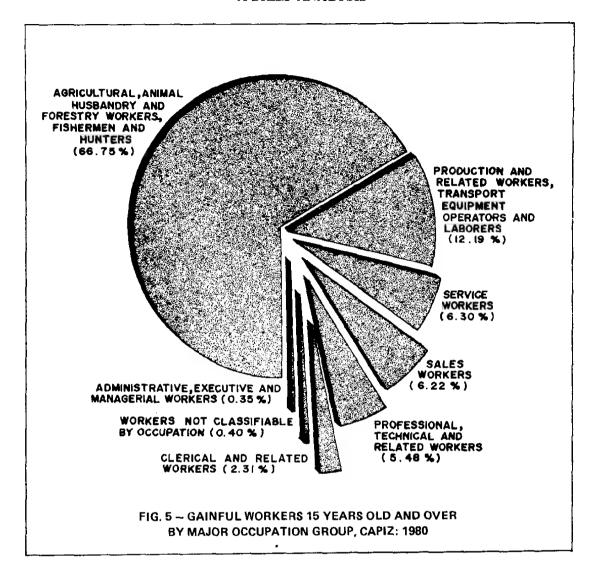

The province has a total of 141,679 gainful workers 15 years of age and over, an increase of 5.90 percent over the past five years or an increase of 9.36 percent over a decade.

Despite a drop in the number of agricultural, animal husbandry and forestry workers, fishermen and hunters, their proportion is still the largest. In 1970, they accounted for 61.88 percent of the gainful workers and increased by 9.06 percentage points in 1975, then finally declined by 4.19 percentage points for the latest censal year. Second in rank are the production and related workers, transport equipment operators and laborers comprising 12.19 percent of all gainful workers, higher by 0.79 percentage point than their 1975 proportion, but lower by 5.39 percentage points than their 1970 proportion. Service workers, although declining by 0.92 percentage point in 1975, gained 0.86 percentage point in 1980. On the other hand, clerical and related workers sustained an upward trend, from 1.27 percent in 1970 to 1.49 percent in 1975 and 2.31 percent in 1980. From fifth place in 1970, sales workers emerged fourth at 5.34 percent and 6.22 percent for 1975 and 1980, respectively. Professional, technical and related workers increased by 1.21 percentage points over the past five years, accounting for 5.48 percent, but did not beat their 1970 proportion of 6.60 percent. At merely 0.35 percent, administrative, executive and managerial workers are the least and dwindled to more than one-third of their 1970 proportion. Workers not classifiable by occupation account for a small 0.40 percent.

The following table reflects the changes in the proportion of workers engaged in various gainful occupations from 1970 to 1980:

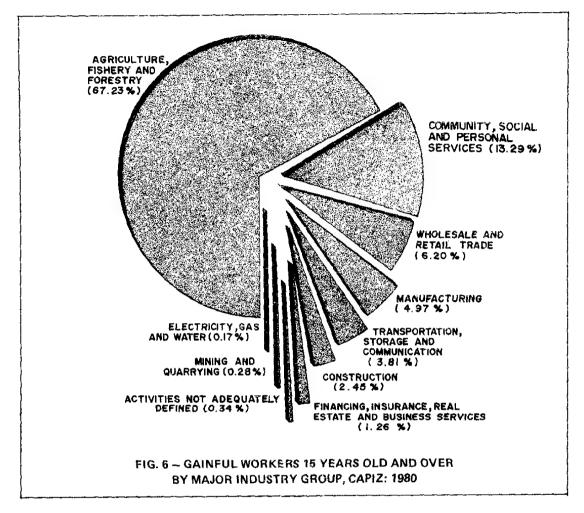

TABLE E ~ GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR OCCUPATION GROUP, CAPIZ: 1970, 1975 AND 1980

Major	1980		1975		1970	
Occupation Group	Number	Percent	Number	Percent	Number	Percent
Total	141,679	100.00	133,782	100.00	129,558	100.00
Professional, technical and						
related workers	7,767	5.48	5,709	4.27	8,552	6.60
Administrative, executive and	•					
managerial workers	498	0.35	496	0.37	1,275	0.98
Clerical and related workers	3,277	2.31	1,998	1.49	1,643	1.27
Sales workers	8,815	6.22	7,140	5.34	6,196	4.78
Service workers	8,918	6.30	7,277	5.44	8,234	6.36
Agricultural, animal husbandry	,					
and forestry workers, fisher						
and hunters	94,575	66.75	94,907	70.94	80,173	61.88

and laborers	17,263	12.19	15,255	11.40	22,778	17.58
Workers not classifiable by						
occupation	566	0.40	1,000	0.75	707	0.55

#### INDUSTRY

Agriculture, fishery and forestry, the dominant industry group, provide work to 67.23 percent of the total gainful workers 15 years old and over. Agricultural crop production is the leading source of employment in this group (85.34%), followed by the fishery workers (13.86%). Meanwhile, 13.29 percent benefit from community, social and personal services. The three leading sources of jobs in this group are personal and household services (42.90%), education services (29.54%), and public administration and defense (16.76%). Only 6.20 percent are engaged in wholesale and retail trade; 4.97 percent derive their sustenance from the manufacturing industry (31.22% in the manufacture of food, beverages and tobacco and 39.23% in the manufacture of textile, wearing apparel and leather). Only 3.81 percent are into either transportation, storage or communication. The rest are engaged in construction (2.45%); financing, insurance, real estate and business services (1.26%); mining and quarrying (0.28%) and electricity, gas and water (0.17%).

## **MIGRATION**

Of the 411,456 total private household population 5 years old and over, 96.75 percent were residents of the same city or municipality on May 1, 1975 and May 1, 1980; 1.77 percent lived in another city or municipality of the same province and 1.40 percent moved across provincial boundaries. A very small percentage of the population resided in a foreign country (0.08%). In the first two migratory movements, there were more female migrants than male migrants, larger by 0.15 percentage point in the inter-municipality migration and by 0.08 percentage point in the inter-provincial migration. For those who resided in foreign countries on May 1, 1975, both sexes shared equal percentages (0.04% females; 0.04% males). Finally, in each movement, a large majority migrated to rural areas (Table 10).

## TYPE OF BUILDING

Almost all (98.48%) of the 86,440 households of Capiz occupy single houses. The rest live either in duplexes (0.64%), apartments/accesorias/condominiums/row houses (0.24%), improvised structures or barong-barong (0.31%), commercial/industrial/agricultural buildings (0.28%), and other housing units such as natural shelter, boat, etc. (0.05%). (See Table 1.)

Majority (87.60%) of the households living in single houses are in the rural areas while only 12.40 percent are urban dwellers. The proportion of households living in duplex in urban and rural areas are 38.29 percent and 61.71 percent, respectively. As expected, there are more apartments/accesorias/condominiums/row houses and similar structures in the urban (61.14%) than in the rural areas (38.86%). On the other hand, 67.67 percent of the 266 households living in improvised dwelling units are in the rural areas while the remaining 32.33 percent are found in the urban areas.

In 1970, 92.11 percent of the 66,193 households lived in single houses and 6.40 percent in improvised structures. Ten years after, the proportion of improvised structure occupants decreased to only 0.31 percent of the total households and that of single house dwellers rose to 98.48 percent.

The table below summarizes the housing conditions of households in Capiz after ten years:

TABLE F - NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS BY TYPE OF BUILDING, CAPIZ: 1970 AND 1980

	19	80	1970		
Type of Building ——	Number	Percent	Number	Percent	
Total	86,440	100.00	66,193	100.00	
Single house	85,122	98.48	60,972	92.11	
Duplex	551	0.64	540	0.81	
Apartment/accesoria/condominium/					
row house/etc.	211	0.24	212	0.32	
Improvised (barong-barong)	266	0.31	4,235	6.40	
Commercial/industrial/agricultural Other housing unit: natural shelter,	245	0.28	230	0.35	
boat, etc.	41	0.05	_		
Hotel, lodging house, dormitory, etc.	_		<del>-</del>	_	
Institutional (hospital, convent, school dormitory, etc.)	4		4	0.01	
Other collective living quarters (military camp, etc.)				_	

## TYPE OF OCCUPANCY

Nearly nine out of ten households (88.43%) of the province are owners of their dwelling units. The rest of the households are either tenants or lessees (4.57%), subtenants or sublessees (0.35%) or rent-free occupants (6.65%).

There are more homeowners in the rural areas than in the urban areas, higher by 0.37 percentage point. On the other hand, tenants or lessees in the urban areas outnumber those in the rural areas by 1.51 percentage points.

## CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Dwelling units of more than three-fourths (75.88%) of the total households have roofs of light materials (cogon or nipa, makeshift or salvaged materials and other such as anahaw, etc.). The remaining proportion (24.12%) had their roofing constructed with

strong materials (galvanized iron or aluminum, tile/concrete/brick/stone, and asbestos). Of the urban households, 58.47 percent had their dwelling units roofed with light materials while 41.53 percent have strong materials. Rural households occupying dwelling units roofed with light materials have a higher percentage compared to those who made use of strong materials – 78.47 percent and 21.53 percent, respectively.

As to construction materials of outer walls, the number of households with dwelling units of light materials (bamboo/sawali, cogon/nipa, makeshift/salvaged materials and other such as anahaw, etc.) is substantially higher (86.33%) than those with units of strong materials (13.67%). In the urban areas, 63.60 percent of the households have units with outer walls of light materials while the remaining 36.40 percent have strong materials. As expected, a great majority (89.72%) of rural households occupy dwelling units of light materials; barely 10.28 percent dwell in units with outer walls of strong materials (galvanized iron/aluminum, tile/concrete/brick/stone and wood/plywood, mixed tile/concrete/brick/stone and wood/plywood, and asbestos).

## YEAR BUILT

Less than one-half (48.80%) of the total households are occupants of structures built between 1975 and 1980; 27.43 percent, during 1971-1975; 17.71 percent, 1961-1970 and 4.78 percent, 1951-1960. Only 0.99 percent live in buildings built during 1942-1950 and a small 0.29 percent, before World War II (Table 2).

## FLOOR AREA OF DWELLING UNIT

Majority of the households (53.57%) occupy dwelling units with floor area less than 30 square meters; 32.40 percent live in 30-49 square-meter dwelling units; 7.30 percent dwell in units 50-69 square meters and 3.51 percent in 70-99 square meters. Very few (3.22%) have spacious dwelling units with floor area ranging from 100 square meters and over (Table 3).

## TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

Of the 76,443 households owning their dwelling units, only 39.91 percent also own the land where the structure is erected. The rest are broken down as follows: 17.99 percent, lessee or sublessee; 15.42 percent, farm lessee or agricultural tenant of landowner; 4.62 percent, other legal tenure; and 22.06 percent, no tenure (squatter, etc.) (Table 4).

## SOURCE AND USE OF WATER SUPPLY

The major source of water supply in the province is the dug well with 75.86 percent of the households obtaining water from it for drinking; 76.90 percent, for kitchen use and 67.17 percent, for laundry purposes. Only a few have the faucet, community water system as their source: 6.67 percent utilize water from this source for drinking; 5.71 percent, for kitchen use and 5.29 percent for washing clothes. Few households (4.96%) use spring water for drinking, for kitchen use (4.36%) and for washing clothes (4.40%). About 4.31 percent use water from tubed/piped deep well for drinking; 3.67 percent, for kitchen use and 3.47 percent, for laundry. Others (3.39%) depend on tubed/piped shallow well for their drinking water; 3.20 percent for kitchen use and 2.60 percent for washing clothes. Only 3.19 percent depend on rain water for drinking, 2.14 percent for

kitchen use and 1.42 percent for laundry. Lake, river and stream are utilized mostly for washing clothes (15.65%). Few households use water from these sources for kitchen use (4.02%) and for drinking (1.62%).

## KIND OF LIGHTING FACILITIES

Kerosene is the most common type of lighting used by majority of the households (76.70%), followed by electricity with 21.11 percent. A small 1.50 percent use liquefied petroleum gas. Most urban dwellers (63.22%) use electricity for their lighting; 36.11 percent use kerosene and 0.40 percent, liquefied petroleum gas. Only 0.27 percent are reported using other kinds of lighting facilities. In the rural areas, 82.74 percent use kerosene and 14.83 percent, electricity. An insignificant number (0.76%) of the rural households use oil and others (Table 5).

## COOKING FUEL

Wood or charcoal is still widely used for cooking by Capiz residents. Table 8 shows that as high as 88.89 percent of the total households use wood or charcoal. The remaining 11.11 percent use either kerosene (7.20%), liquefied petroleum gas (2.20%), electricity (0.42%) or other kinds (1.29%). In both urban (85.86%) and rural (89.34%) areas, the predominant use of wood or charcoal is observed. Furthermore, urban residents using liquefied petroleum gas for cooking have a higher proportion than their rural counterparts — 7.16 and 1.46 percent, respectively.

## TOILET FACILITIES

Closed pit (antipolo, etc.) and open pit are the common types of toilet facilities being used by 40.90 percent and 39.89 percent, respectively, of the total private households. A small proportion of the households (6.42%) use water-sealed with sewer or septic tank; 6.09 percent utilize the water-sealed with other depository and 0.58 percent, other types (pail system, etc.). There are still households (6.12%) without toilet facilities. Urban households have better toilet facilities than their rural counterparts. Among urban residents, 41.21 percent use water-sealed toilets; 39.48 percent use closed pit and 16.33 percent, open pit. Barely 0.95 percent use other types like the pail system while 2.03 percent have none at all. Among the rural households, 43.40 percent use open pit; 41.11 percent, closed pit; 8.24 percent, water-sealed with sewer or septic tank and with other depository; 0.52 percent, other types and 6.73 percent have none (Table 7).

## OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

More than sixty percent (61.56%) of the total private households in Capiz have radios; 6.58 percent own television sets while 5.13 percent have refrigerators or freezers. Of the 11,208 urban households, 70.33 percent own radios; 24.77 percent and 19.65 percent possess television sets and refrigerators or freezers, respectively. Among the rural households, 60.25 percent have radios; 3.87 percent, television sets and 2.97 percent, refrigerators or freezers.
